

Post-Fire Recovery All-Hands All-Lands Workshop

May 12 – 13, 2025 Ellensburg, WA

Purpose

The All-Hands All-Lands Workshop is intended to bring together people working on post-fire recovery across WA and the PNW, we aim to improve how watersheds, working lands, communities, infrastructure, and people recover from wildfire. This includes recovery readiness planning, actions taken during the fire, and in the months to years following.

We will learn from each other to improve recovery coordination, share best practices, and network with other professionals. This year we will spend time working to develop locally led BAER teams, learn about county-led recovery readiness guides, post-fire in CWPPs, a policy update, science, and more.
