

# Drone TRES

## Calling all High Flying Pyro-Conservationists!

The Nature Conservancy in Arkansas is excited to host the second annual Drone TRES at the beautiful Grandview Prairie Nature Center in Southwest Arkansas. This year's event will feature five action-packed days of classroom instruction and live-fire training.

Participants will cover key topics including laws and regulations, IGNIS operations, hands-on emergency flight procedures, mapping and Rx Fire Task Book work—all while enjoying great food and camaraderie. Bring your best stories for our evening Fireside Lessons Learned circle. Training will take place August 2-8, 2026, consisting of five training days and two travel days. Participation is limited to 12, and priority will be given to those holding FIRB or higher qualifications. However, if you do not meet these requirements, we still encourage you to apply to be considered as an alternate.

Last year, we completed 50 diverse drone missions, burned 253 acres using the IGNIS system, worked on nine task books, and finalized four. We are confident this year will be even more successful and look forward to flying the smoky skies with you.
